

## E Fire Ball

The E Fire Ball was created to fill the grey area between fixed systems & Portable Fire Extinguishers. The Ball is a proximity-based product that activates (3-5 seconds) only when it comes in contact with flame.

### How to Use (Added Fire Protection)

- Fixed/Mounted — Mounted in areas of concern. Proximity-based product designed for Insipient Fire “initial phase of a fire”, to mitigate the fire at flash point
- Developed to respond quickly to small fires.

### E Fire Balls are:

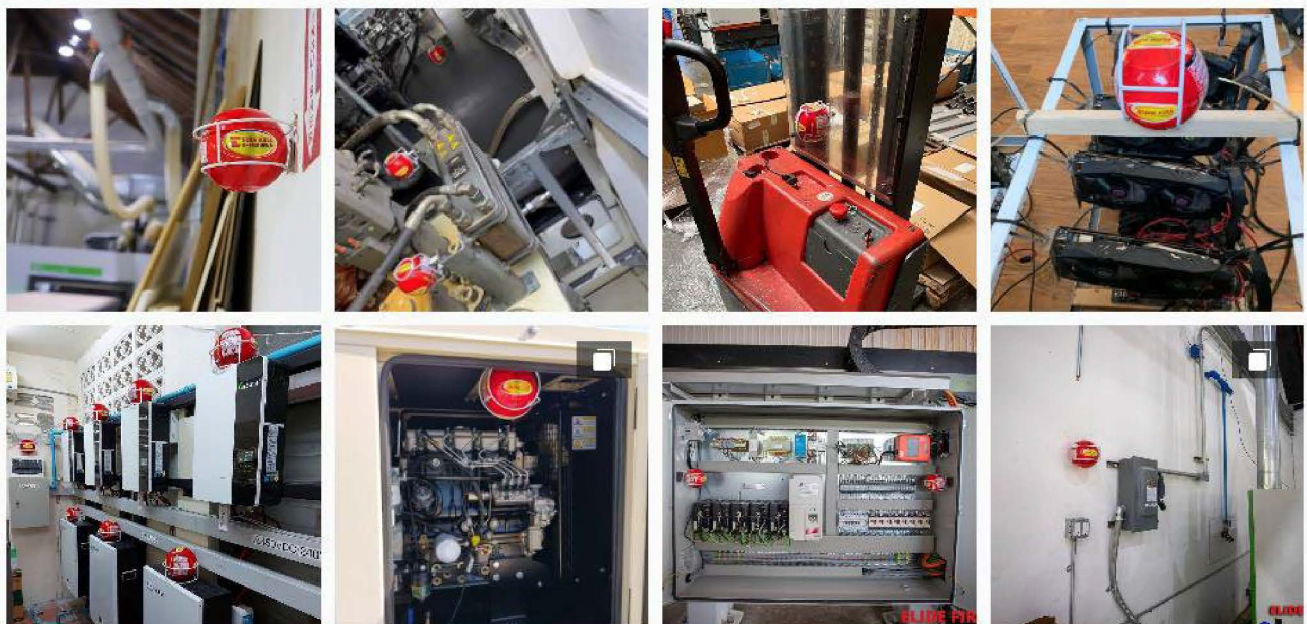

- Light & Portable — 2.86 lbs
- Rapid Activation — 3-5 seconds
- Life span — 7-10 years
- Non-toxic, environmentally friendly • 24/7 fire prevention

### Additional Features:

- Electric/manual Activation
- Ability to connect to existing fire systems, smoke alarms & home security systems.

## Innovation in Fire Safety Because... There is Never Enough Fire Protection!

Note: The E-Fire Ball is not intended to replace existing fire suppression tools but rather to provide an additional layer of fire protection, because you can never have enough Fire Protection!
